ABSTRACT

Colorful of Hala-bala painting collection depicted the beauty of Hala-bala rain forest, the largest tropical rain forest in Thailand. The forest provides habitat for diversity wildlife and plants particularly variety of hornbill species which indicates the richness of this forest.

Thus the creator had intensely delivered this message through realism painting collection. The collection consists of 6 paintings in the size of 70X90 cm. Painter applied spray and acrylic painting technique on canvas. Spray painting leaves from Hala-bala forest was used for composition in order to emphasis the hornbill. The painter also applied a unique and innovative simplification technique in order to create unity of the pieces which would be beneficiary for other interesting creators. The painting pieces want to represent an awareness of Hala-bala forest conservation to the society.
